DETAILED ACTION

1. Claims 57, 59, 66-69, 74 and 76 are amended.

Allowable Subject Matter

2. The following is an examiner's statement of reasons for allowance: Claims 57-63 and 66-77 are allowed because of the reasons as follows:

Lear (US 5493577) discloses a VCSEL as claimed except for "at least one pit extending from said first surface of said laser structure into the body of said laser structure". Lear instead discloses "etched depression extending from said first surface of said laser structure into the body of said laser structure", which is best described in Fig. 2 and in col. 8, lines 46-67 to col. 9, lines 9, also col. 10, lines 15-62. Lear teaches etching the sidewall of the central portion of the VCSEL thereby creating a mesa while the claims require "at least one pit" which provides the benefit that "interconnect metallization may be added subsequently onto a planar surface without the need to deposit metal on the sidewall of a mesa."

Therefore the claims overcome the teaching from Lear.

The application soughts interference with US patent 5903588. However, the amended claims are now different from the claims in the US Patent. Therefore, no interference is declared.
